**Lumene @ the ISE 2008**

**Booth D 100 - Hall 3  
Jan 29<sup>th</sup> to 31<sup>th</sup> 2008  
Amsterdam RAI, NL**

Because Home Cinema is no longer the preserve of wealthy people, Lumene has been developing high-quality projection screens for an affordable price since 2003.

In the coming 2008, the Lumene line is going to be fully re-work, integrating more products, additional sizes and sorts of fabric, enhancing custom installation compatibility, multiplying possibilities of use and developing new remote control devices.

The 2008 range of Lumene projection screens will be able to fulfil all needs in terms of use and integration. This **new line will be available in summer 2008** and will be introduced for the very first time ever, in the VIP room of Lumene @ the coming ISE in Amsterdam.

**5 new screens**, including the **Eden**, but also a new high end **Manual** screen, a new high end **Electric** screen, a new high end **tensioned Electric** screen and a new **Fixed Frame** screen... Do not miss this unique chance to discover the brand new Lumene range: the coming Lumene screens will feature a beautiful design and even more convenient features.

**Eden: advanced availability in March 2008**

Available in 150 cm and 180 cm width (16:9 aspect ratio) Eden is a motorized (Somfy powered) pop up screen. Enclosed in a smart black case, Eden will easily turn any room into a classy and prestigious Home Cinema area.
